

STEM SHOWCASE 2018

BOOTH HOSTS NEEDED

Be a part of the 6th Annual West Sound STEM Showcase! On Saturday, April 28, 2018 the Showcase will present **science, technology, engineering, & mathematics** principles at a fun, interactive event. The goal of the STEM Showcase is to inspire students, parents, teachers, and the general public with STEM activities/projects and show how they are applicable in everyday life. Join us at the Kitsap Mall as dozens of area organizations, schools and students host booths with hands-on activities to engage youth of all ages. **It is free to host a booth!**

The West Sound STEM Network is again hosting a bridge-building challenge for students elementary to high school. Students construct bridges using specified materials, dimensions, and load testing criteria prior to the STEM Showcase, then bring their models to the event. Bridges will be tested in center court all day!

Last year, over 2,000 people attended the STEM Showcase and participated in STEM experiences at **over 60 booths** including catapults, robotics, rocket launches, electronic circuitry, medicine, broadcast technology, bridges, animals and more. The sky is the limit! Come share your ideas and innovations to help area youth get excited about **science, technology, engineering, & mathematics** in action!

No cost to host a booth!
No cost for participants - free and open to the public!

For more information or to sign up, contact Corinne at corinne.beach@navy.mil or call 360-627-3928.

Information on the Showcase and hosting a booth can be found at www.westsoundstem.org
