

Remote FieldSTEM and Schoolyard Investigations for 2nd and 3rd Grade

Wednesday, October 7, 2020 | 4:00 PM to 7:00 PM

Join Pacific Education Institute's Tressa Arbow and Hattie Osborne for this three hour online Zoom workshop introducing Remote FieldSTEM and Schoolyard Field Investigations for **2nd and 3rd grade educators**. FieldSTEM is an integrated framework that facilitates career-connected, locally-relevant, field-based learning. In this primer, participants will learn how simple field investigations can be incorporated into current science units to provide students with contextually-relevant science skills and practices. We will also be providing support for adapting FieldSTEM resources to the distance learning context.

Participants will:

- Experience FieldSTEM student management strategies
- Learn about the NGSS Science and Engineering Practices and what they look like in practice
- Receive mentored time to work on field investigation development and planning time with already created schoolyard investigations

Participants who attend will receive:

- Access to a schoolyard field investigation for their grade level
- 3 Washington State approved STEM clock hours
- A \$75 participation stipend
